

ORBITAL CONSUMER SYSTEMS LTD.

Synthetic Financial Report — FY 2026

Important Notice

This fictional document is intended only for testing an AI Financial Document Q&A; Assistant. It is not investment advice.

Company Overview

Orbital Consumer Systems Ltd. provides point-of-sale hardware, payment terminals, customer loyalty software, and managed technology services across India and Southeast Asia.

Financial Highlights

Revenue: Rs 265.0 million, compared with Rs 230.0 million in FY 2025. Gross profit: Rs 132.5 million, compared with Rs 119.6 million. Operating profit: Rs 26.5 million, compared with Rs 32.2 million. Net profit: Rs 15.0 million, compared with Rs 21.5 million. Cash balance: Rs 29.0 million, compared with Rs 35.0 million. Total debt: Rs 42.0 million, compared with Rs 30.0 million.

Key Ratios

Gross margin: 50.0% versus 52.0%. Operating margin: 10.0% versus 14.0%. Net profit margin: 5.7% versus 9.3%. Customer retention: 86.0% versus 90.0%.

Management Discussion

Revenue increased because of stronger hardware sales and new payment-terminal deployments. Profitability declined due to higher component costs, logistics expenses, regional expansion, and product-certification costs. Debt increased to fund equipment purchases and expansion.

Risk Factors

Major risks include component cost volatility, higher finance costs, lower customer retention, regulatory costs in new countries, and dependence on third-party payment networks.

FY 2027 Outlook

Management has set an internal revenue objective of Rs 305 million and plans to improve margins through supplier renegotiation, automation, and increased recurring software revenue. These are targets, not guarantees.

Comparison Questions

1. Which company had higher FY 2026 revenue? 2. Which company had better gross and net margins? 3. How did debt change for both companies? 4. Which company generated more operating cash flow? 5. What explains the difference in profitability? 6. Compare the FY 2027 revenue targets.
